3D welding tables –
THE original
for over 30 years

2021

Inventions by DEMMELER that reach around the world – We have been setting innovative standards in welding production for over 30 years.

In 1961, at the age of 19, Ludwig Demmeler founded the company in a garage. With ideas, courage and great commitment, the company has been able to develop very successfully up to the present day. **In 2014, Ludwig Demmeler received the Federal Cross of Merit of the Federal Republic of Germany for his entrepreneurial success and for his great honorary commitment as district craftsman.** The second generation, Johannes Demmeler, has been working in the company since 1990 and has been responsible for the success of the group of companies as managing director since 2001.

DEMMELER set the standard on the market as an important milestone as early as 1990 with the invention of the 3D clamping system and 3D welding table D28: Originally intended for the company's own production, the device system proved to be a quantum leap in metal processing and today is an international standard for trade and industry due to the many possible applications and combinations. Today, DEMMELER works with the **highest vertical range of manufacture and highly automated**, on more than 40,000 m² of factory space. The company's growth was accompanied by several **product developments and patents**, which were first produced only for their own production facilities. Put through their paces, we deliver these products to tens of thousands of customers worldwide. In addition to the **3D clamping system**, **these also include the turning, tilting and carousel rotary tables, as well as 3-axis manipulators, tool arenas and tool machine components.** With our unique new development, the **COBOT WeldSpace 4.0®**, we have succeeded in developing a perfect product that professionalises welding workstations, starting with small and medium-sized companies, despite the shortage of skilled workers, and thus makes them fit for the future. You can continue to rely on our **quality and innovation of the original, made by DEMMELER**, to achieve the best results in the future.

Productivity³

SPACE A1
SPACE A2
SPACE B

The new COBOT WeldSpace 4.0® welding cell from DEMMELE comes with everything you need for professional COBOT welding.

In the future, advances in digitalisation and automation will also change the processes in welding production. Particularly in the manual welding of classic sheet metal components, the new technology, welding with collaborative robots, can relieve valuable skilled workers from tiring routine and repetitive tasks. With the **COBOT WeldSpace 4.0®** from DEMMELE even small and medium-sized companies are guaranteed a **quick start in automated and professional welding production thanks to the fast commissioning and extremely simple programming**. Whether individual parts, series or small batch sizes with a large variety of parts, you save time in welding and reworking. The fully equipped welding cell with welding robot and welding technology offers unique modularity and flexibility in the smallest possible space with a possible four workspaces SPACE A, A1-A2 and SPACE B. The COBOT WeldSpace 4.0® can be operated and programmed without welding expertise.

2 x 3m² work areas

Four workspaces with perfect accessibility from all sides

WorkSpaces

SPACE A2

SPACE A1

SPACE A

Equipped with a DEMMELE 3D welding table 2400 x 1200 mm optionally with system D16, D22 or D28. The SPACE A workspace can optionally be divided into SPACE A1 and SPACE A2 by a partition wall.

SPACE A

SPACE B

SPACE B

Depending on requirements, the **SPACE B** workspace can be **optionally** equipped with another DEMMELE 3D welding table with a maximum size of 2,000 x 1,000 mm or **with a two-axis manipulator with a payload of up to 500 kg**. This enables highly productive welding in the flat position.

Innovative welding technology and sophisticated details Well-equipped with high-quality components and first-class equipment

- ⊕ **Welding cell with up to four working spaces SPACE A (optional A1/A2) plus SPACE B with perfect accessibility from all sides.**
Crane loading for set-up and workpiece change also possible through movable portal.
- ⊕ **Automatically moving protective enclosure with 2 roller shutter doors** made from aluminium armour with viewing elements made of protective welding glass.
- ⊕ **Collaborating welding robot UR10e** (mounted overhead). The COBOT UR10e collaborative robot arm has everything that is important for robotic welding tasks. A generous reach of 1.30 m plus handle and torch, adequate

load capacity, maintenance-free technology and sophisticated technology. The combination of the free-drive function and the touch display makes the UR10e very easy to operate and program.

- ⊕ **DEMMELE WeldSpace Programming and Operating Concept (DWSP).** Specially developed software with many functions which - together with the innovative 3-button handle - makes the creation of complex welding programs child's play. The software guides the operator intuitively through the menu and with the 3-button handle, waypoints and spot welds can be transferred directly into the program. An extensive job library that can be expanded at any time, in which parameters and characteristic curves for typical

welding applications are stored, leads to the perfect welding result.

- ⊕ **Smart Toolbox** with three lockable drawers
- ⊕ **Gas bottle holder** for up to 2 gas bottles
- ⊕ **Connection options for a central hall extraction system or a mobile welding fume extraction system** on the left or right side and twice at the top of the unit.
- ⊕ **Light-emitting diode strips** on all side corners visualise processes and machine states.

Enclosure and plant

Perfectly coordinated welding processes

- ⊕ **Integrated and professional high-performance welding system.** Robot welding equipment optionally from the FRONIUS or EWM brands. The welding system is integrated in the table substructure to save space.
- ⊕ **Torch cleaning station with wire cutting device and injection unit.** Optimum and reliable cleaning of the gas nozzle ensures a reliable welding process and increases system availability.

Further information and equipment options

for the DEMMELE COBOT WeldSpace 4.0® you will find on our website www.demmeler.com or simply scan the QR code.

Welding equipment

The optimum 3D precision welding table for every application. Top features for even more efficiency during welding.

With our 3D clamping system, you have the right solution for clamping, turning and positioning work pieces readily available. Optimum positioning of the work piece not only makes work more accurate but also much more effective. Above all, the intelligent system grids and the flexible and well thought-out clamping tool range allow you unlimited clamping possibilities. Products from the original DEMMELER 3D clamping system stand out for their extreme robustness and durability.

The system sizes D16, D22 and D28:

Pendulum foot with stable
M30x2 (system D28),
M28x2 (System D22)
or
M24x2 (System D16)
threaded spindle,
finely adjustable
 $\pm 30 \text{ mm}$.

Simple, stable
mounting

Legs you can rely on.

Efficient working guaranteed! Starting with the finely adjustable standard leg and on through the mobile heavy-duty wheel, a variable selection of table legs are available for the various table systems and permit any application. This offers you greatest possible freedom during your manufacturing operations. Thanks to the intelligent design, the legs can be fixed simply and stably. The robust construction guarantees a long service life. To this end, foot sleeves prevent pinching the welding hose and protect the threaded spindles against dirt.

* The lengths of the standard table legs in the basic version are as follows for D28: $650 \pm 30 \text{ mm}$, D22: $700 \pm 30 \text{ mm}$ and D16: $750 \pm 30 \text{ mm}$. Furthermore, standard table legs are also available in lengths for D28: $750 \pm 30 \text{ mm}$, D22: $800 \pm 30 \text{ mm}$ and D16: $850 \pm 30 \text{ mm}$.

The benefits of a 3D clamping system from DEMMELER!

Max. load

Precision scaling

Protective countersink

Additional bores

Foot sleeve

The system grids of the system sizes:

For delicate applications

D16 PROFIPlusLINE (PL)

- Diagonal grid 50 x 50 mm
- 3-row bore pattern on the table side plates, 50 mm grid in the top, middle and bottom row

D16 PROFIecoLINE (PE)

- Grid 50 x 50 mm
- 3-row bore pattern on the table side plates, 50 mm grid in the top, middle and bottom row

For light and medium-duty applications

D22 PROFIPremiumLINE (PP)

- Grid 50 x 50 mm
- 3-row bore pattern on the table side plates, 50 x 50 mm diagonal grid

D22 PROFIPlusLINE (PL)

- Diagonal grid 100 x 100 mm
- 2-row bore pattern on the table side plates, 50 mm grid

For everyday, large welded constructions

D28 PROFIPremiumLINE (PP)

- Grid 50 x 50 mm
- 3-hole drilling pattern in the table side plates, 50 mm grid in the top and bottom rows with additional 100 mm grid in the middle

D28 PROFIPlusLINE (PL)

- Diagonal grid 100 x 100 mm
- 3-hole drilling pattern in the table side plates, 50 mm grid in the top and bottom rows with additional 100 mm grid in the middle

D28 PROFIecoLINE (PE)

- Grid 100 x 100 mm
- 3-hole drilling pattern in the table side plates, 50 mm grid in the top and bottom rows with additional 100 mm grid in the middle

D28 HobbyLINE (H)

- Grid 100 x 100 mm
- Worktop approx. 25 mm high with system bores in a 100 mm x 100 mm grid

Our 3D welding tables achieve the best surface properties with the specially optimised DEMONT hardening process. This makes them even more wear-free and durable.

- All our welding tables are **generously sized, super sturdy** and optimised with FEM calculations on principle.
- **Axis designation in x and y-direction.** Standard version includes precision scaling.
- **Optimum bolt and clamp insertion** with simultaneous protection of the tabletop against damage from materials, even in case of extreme strain on the system bore or when used with aluminium.
- Additional **bores in the side stanchion** for even more clamping options.
- The extremely solid design ensures **very high load-bearing capacity – 3,000 kg per leg.** The foot sleeve prevents pinching and reduces wear at the cable-hose assembly. This also provides a convenient way of using the ground connector. It also protects the threaded spindle against dirt and wear. Fine adjustments are possible and fixing is stable and simple.

Modular 3D precision welding tables of the D28 system series – with the best characteristics

For the toughest requirements

When using the 3D clamping system, the optimum flow of electricity between the electrode / filler wire and ground connector is vitally important. That is why DEMMELER optimises the material properties of its worktables and accessories and guarantees outstanding precision for optimum form fits.

Highly resilient

All our welding tables are generously sized, super sturdy and optimised with FEM calculations on principle.

Precise work made easy

with coordinate marking of the bores in the X and Y-direction and fine scaling

The perfect job

The foot sleeve prevents pinching and reduces wear at the cable-hose assembly. It also protects the threaded spindle against dirt and wear. Fine adjustments are possible and fixing is stable and simple (M 30 x 2).

Flexible clamping

Additional bores in the side stanchion for even more clamping options. For all D28 system lines, 3-hole drilling pattern in the table side plates, 50 mm grid in the top and bottom rows with an additional 100 mm grid in the middle

Extremely solid for highest payloads

for highest payloads - 3,000 kg per foot.

Different foot variants are possible for system size D28

- Standard table foot in length 650 ±30 mm (Optional: Length 750 ±30 mm)
- Telescoping leg
- Heavy-duty wheel
- Anchoring leg
- Scissor lift
- Leg for spacer block
- Shifting leg
- Holding frame

Protect and care for your welding table

With our care products you can professionally protect, clean and maintain your welding table. This not only increases the life of your welding table, but also ensures a clean and level work surface.

1 Protective spray

- Prevents the adhesion of weld spatter on the surface
- Temporary corrosion protection
- Good cleaning effect
- Without chlorinated hydrocarbons, silicone-free, non-flammable
- Biodegradable

**Protective spray
in 1 litre pump bottle**
Item no.: D00-10005-000

**Protective spray
in 5-litre canister**
Item no.: D00-10006-000

2 Bench stone

- To care for the system surfaces of worktables and system components

Item no.: D00-10007-000

3 Round brush D28 mm

- For cleaning the system bores
- With splash guard

Item no.: D28-10002-000

Reduced to the essentials, yet tremendously flexible

D28 Clamping and locating angles PROFIEcoLINE, hardened casting

- System bores in a 50 mm grid
- 3 usable stop sides for all common stopping and clamping tasks
- Hardened casting
- Cost-effective version
- Three supporting surfaces
- With precision scaling
- With face plate
- A 275 mm, B 190 mm, C 600 mm, D 80 mm
- Weight approx. 19 kg

Item no.: PE28-03003-000 (right)

Item no.: PE28-03003-001 (left)

Time is money, your tools must be ready to hand.

Simple attachment of the "smart toolbox" via system bore hole. Connecting elements are included in the scope of delivery. System components are not included in the scope of delivery.

D28 smart toolbox for 3D welding table systems D28

- The ideal complement to the "clever toolbox"
- Robust drawer base units made of sheet steel
- Optionally with two or three drawer elements
- Protects tools and small parts safely from dirt and welding spatter
- Max. Load capacity "smart toolbox" approx. 125 kg
- Max. Load capacity per drawer approx. 50 kg
- A 275 mm, B 190 mm, C 600 mm, D 515 mm

(1) Underbench drawer cabinet with two drawer pull-outs

Item no.: D28-11001-032

(2) Underbench drawer cabinet with three drawer pull-outs

Item no.: D28-11001-033

D16 D16 PROFIPlusLINE Set 255

Item no.: D16-52000-255 (87-piece)

DEMMELE welding and clamping systems are modular and flexible. All sets and accessories can be used at all the 3D worktables within the system. What is more, you can individually assemble or supplement your sets with the large selection of DEMMELE accessories! The DEMMELE general catalogue is available at www.demmeler.com.

This clamping accessory should not be missing in any workshop. Tools for every clamping situation.

Precise holding of tube elements

D28 Adjustment V-block D28 ø 58 mm

- Precise holding of tube elements
- Screwed in with countersunk head screw
- For tube diameter up to 70 mm
- Steel, blackened
- Prism mounts also available in stainless steel and POM
- Weight approx. 0.68 kg
- A 35 mm, ø B 58 mm
- Angle: 130°

Item no.: D28-09003-000

Can be locked and fixed on five sides in 25 mm increments

D28 Universal stop D28 large with four recesses

- Combination bore / slotted hole, infinitely adjustable via slotted hole
- With PC-bolt in table hole pattern 5-sided locking and fixation in 25 mm grid
- 360° adjustable positioning in 45° increments
- With precision scaling
- Steel, hardened
- Weight approx. 1.2 kg
- A 225 mm, B 50 mm, C 25 mm

Item no.: D28-05001-000

Optimal for
use as table
extension, e.g.
Spacer block D28
U-Form steel L 1000
Item no.:
D28-04002-001

For fast, powerful and accurately positioned clamping

Stepless swivel – rotate 360°

D28 Screw clamp 180° with spindle

D28 Performance screw clamp with spindle

- With adjustable, sturdy round tube, each tube can be used individually
- Adjustable projection
- Can be inserted through system bores, eliminating avoidable interfering edges
- Highest force transmission with sturdy round tubes
- Entire clamping mechanism is exchangeable
- Clamping pad exchangeable
- Available in two further spans 190 mm and 420 mm available
- A 220 mm, B 270 mm, C 350 mm

- Universally usable for the horizontal/vertical and oblique clamping of work pieces
- Continuously swivelling and 360° rotating
- Adjustment range of clamping spindle over 130 mm by rotating the retaining tube without having to move the clamp (previous version: 68 mm)
- Can be folded together flat (less storage space required)
- With three exchangeable actuation modes (spindle, short boring spindle and quick-action clamping cylinder)
- A 240 mm, B 180 mm, C 270 mm
- Weight approx. 2.2 kg

Span max. 270 mm
Item no.: D28-07005-014

Item no.: D28-07009-033

Suitable system accessories, such as actuation types or taper fitting and V-block locations for screw clamps, can be found online at www.demmeler.com.

Optimally
clamped with
PPC bolt

A Alu-
Titan

**Flexible stop –
Foot plate can be moved
in 50 mm increments**

**D28 Clamping and locating angle
D22 PL 300, aluminium-titanium**

- Extended face plate with two bores in the face plate
- Extended mounting plate with oblong hole 150 – therefore moveable on 50 mm worktop grid
- A 275 mm, B 190 mm, C 600 mm, D 150 mm
- Weight: 1.7 kg (D22), 1.8 kg (D28)

D22: Item no.:
PP22-03001-017

D28: Item no.:
PP28-03001-017

stops and clamping
brackets online:

Work can be so easy.
Tools with multiple
application possibilities.

A Alu-
Titan

**D28 Clamping and locating
angle D28 PP 300,
aluminium-titanium**

- Stiffeners in the corners with 90° system groove in kidney shape
- Hole grid at 50 mm intervals, also on all angle sides
- Extended face plate with additional bore
- 4 stop faces / usable surfaces
- 2x system groove 200 mm
- 2x system groove in 90° kidney shape
- With precision scaling
- Anodised
- Weight: 5 kg
- A 275 mm, B 180 mm, C 300 mm

Item no.: P28-03002-002 (right)

Item no.: P28-03002-003 (left)

Order with system.

With these accessory trolleys, welding table workplaces are always well organised.

Mobile accessory trolleys in any system size

D28 D22 D16 Accessory cart

- Establishes a tidy and orderly workstation
- Faster access to the system components
- Large angles are safely and conveniently stored inside the cart
- Fast to transport thanks to four sturdy 360° swivelling casters, one of them locking.
- System components not included in the scope of delivery.
- D28: A 1,000 mm, B 650 mm, C 1,010 mm, weight: approx. 60 kg
- D22: A 800 mm, B 503 mm, C 1,020 mm, weight: approx. 55 kg
- D16: A 600 mm, B 450 mm, C 870 mm, weight: approx. 35 kg

Accessory cart D28:

Item no.: D28-11001-000

Accessory cart D22:

Item no.: D22-11001-000

Accessory cart D16:

Item no.: D16-11001-002

D16 Tool trolley D16

- Four closed drawers protect the contents against contamination and provide quick access to the system parts
- Locking
- Mobile on four casters, two of them swivelling and locking
- System components not included in the scope of delivery
- A 740 mm, B 560 mm, C 970 mm

Item no.: D16-11001-000

Our practical drawer base cabinets "clever toolbox" for the systems D28 and D22 offer a lot of storage space and protect your clamping accessories from dirt and welding spatter.

D28 clever toolbox D28

Item no.: D28-11001-015

Optionally orderable:

(1) Universal box D28
Item no.: D28-11001-017

(2) Bolt magazine D28
Item no.: D28-11001-016

Plug-in bolt bottom D28
Item no.: D28-11001-018

D22 clever toolbox D28

Item no.: D22-11001-015

Optionally orderable:

(1) Universal box D22
Item no.: D22-11001-017

(2) Bolt magazine D22
Item no.: D22-11001-016

Plug-in bolt bottom D22
Item no.: D22-11001-018

The **clever toolbox** can be mounted on all four sides and has a load capacity of up to 170 kg.
(10 locking pins, bottom are included in the scope of delivery.)

European patent
No. 2569548

Original DEMMELER PPC clamping bolt

Self-centring, force-locked and low-wear clamping

The DEMMELER PPC bolt's cone clamping system makes the bearing surface 100 times larger. This results in much higher contact pressure, therefore securing work pieces more reliably. Even force distribution also reduces bore hole wear compared to conventional bolts.

PPC bolt

ECO-bolt

Comparison of clamping pins and the polygon bolt from DEMMELER

Using the PPC bolt prevents serious damage to the bores that can be caused by clamping pins, for example with aluminium-titanium blocks.

D28 THE ORIGINAL – PATENTED – PPC bolt D28 short

- Highest clamping force with large stroke
- Polygon-shaped expansion elements reduce the wing loading
- Very quick to clamp and unclamp
- Force-locking through full-area contact
- Easy on materials
- Extremely robust
- Low susceptibility to dirt
- Limit clamping range 41-47

Item no.: D28-06025-000

DEMONT 760 M
BLACK EDITION

D28 Clamping and locating angle PE large bore / oblong hole

- Combination system bores / oblong hole for numerous clamping possibilities
- Precision scaling on both sides
- Two full angle surfaces – therefore can be used from both sides
- Compatible with all clamping and locating angles so that the oblong hole can be used to form a height-adjustable support
- Hardened casting
- A 275 mm, B 190 mm, C 600 mm, D 25 mm
- Weight approx. 2.4 kg

Item no.: PE28-03008-000

As the inventor of the modular 3D welding table and clamping systems, we shape our development and innovation around the modular clamping and manipulation of components. Numerous products are developed and redesigned each year. Our general catalogue comprises **620 pages** and offers a complete overview of our entire product line with many interesting example applications. We would be happy to send you the catalogue and brochures on our entire product portfolio in printed or digital form. PDFs of the brochures are also available for download at www.demmeler.com.

Convenient online ordering: in the DEMMELE webshop

Discover our entire product range for clamping systems, tools and accessories on our website and order conveniently online.

Subscribe to our new YouTube Channel that showcases
many products and example applications.
